

Summary

AI Engineer and CS (AI & DS) student with 2+ years of experience in building autonomous AI agents, RAG pipelines, voice systems, and full-stack ML applications. Skilled in Python, JavaScript, and cloud deployment. Seeking AI/ML engineering internships with remote opportunities.

Technical Skills

Languages:	Python, JavaScript, TypeScript	Libraries/Frameworks:	TensorFlow, PyTorch, Keras, LangChain, LlamaIndex, OpenAI API, Pinecone, MongoDB, DVC, MLflow
AI / ML:	NLP, LLMs, Computer Vision	Cloud/DevOps:	AWS S3, Polygon (Web3/Solidity)
Frameworks & Tools:	LangChain, LlamaIndex		
Infrastructure:	Docker, Kubernetes		
iOS:	SwiftUI, CoreML		

Experience

Artificial Intelligence Intern Stark Digital Media Services Pvt. Ltd.	June 2025 – July 2025
- Built a GST Invoice Chatbot using NLP to guide users through invoice workflows, reducing manual support overhead. - Engineered a real-time AI Voice Assistant for user support. - Architected an enterprise RAG system for secure, context-aware knowledge retrieval across business documents. - Developed an AI document verification pipeline using OCR and ML to automate validation and eliminate manual processing.	

Projects

RoadRupture – AI Pothole Prediction App SwiftUI, MapKit, FastAPI, LightGBM	GitHub
- Native iOS app predicting pothole locations using LSTM/Prophet (forecasting) trained on historical data. - Delivered geospatial risk heatmaps and real-time alerts, and crowdsourced pothole reporting with user photos.	
LabChain Sentinel – Autonomous Risk Detection Python, FastAPI, Gemini API, Pydantic	GitHub
Built a closed-loop autonomous system for stock-out risk and auto-generates purchase orders with audit logs.	
AutoReferral – AI Healthcare Referral System FastAPI, React, Agentic AI GDG Bangalore	Live Demo
Designed and deployed within 24 hours a system that recommends referral options with calibrated confidence and explainable healthcare insights.	
BluCarbon – Blockchain Carbon Credit Marketplace React, FastAPI, MongoDB, Solidity, IPFS	GitHub
Co-built a full-stack blue carbon marketplace with NFT carbon credits minted on-chain and verified via satellite DVI analysis, CNN field-data credibility scoring, and smart contracts.	
MLOps Pipeline – End-to-End ML Deployment DVC, MLflow, FastAPI, Docker, OAuth2	GitHub
Containerized MLOps lifecycle: Data versioning, hyperparameter tuning, cloud deployment, and a JWT-secured FastAPI inference backend.	

Education

MIT World Peace University, B.Tech – Computer Science, Artificial Intelligence & Data Science	Aug 2023 – Jun 2029
