

AI Engineer and CS (AI & DS) student with 2+ years of experience in building autonomous AI agents, RAG pipelines, voice systems, and full-stack ML applications. Seeking AI/ML engineering internships with remote work options. From system design to cloud deployment. Seeking

Languages:	Python
AI / ML Frameworks:	TensorFlow, PyTorch, Keras, Scikit-learn, XGBoost, LightGBM, LSTM, Scikit-learn
Backend Frameworks:	Flask, Django, FastAPI, Pinecone, MongoDB, DVC, MLflow
Infrast. / Cloud:	AWS S3, Polygon (Web3/Solidity)
iOS:	

June 2025 – July 2025

- **Streamlined Data Flow:** The architecture facilitates the seamless integration of data from various sources, ensuring that information is readily accessible and up-to-date.
- **Enhanced User Interaction:** By providing a unified interface, the system improves the user experience, making it easier to navigate and interact with the data.
- **Scalability and Flexibility:** The design is scalable, allowing it to handle increasing amounts of data and users without compromising performance.
- **Security and Compliance:** The system is built with robust security measures to protect sensitive data and ensure compliance with relevant regulations.
