

Summary

AI Engineer and CS (AI & DS) student with 2+ years of experience in building autonomous AI agents, RAG pipelines, voice systems, and full-stack ML applications. Skilled in system design to cloud deployment. Seeking AI/ML engineering internships with remote options.

Technical Skills

Languages:	Python, JavaScript, SwiftUI	
AI / ML:	NLP, LLMs, LangChain, TensorFlow, PyTorch, XGBoost, LightGBM, LSTM, Scikit-learn	
Frameworks & Tools:	LangChain, OpenAI API, Pinecone, MongoDB, DVC, MLflow	
Infrastructure:	Docker, Kubernetes, AWS S3, Polygon (Web3/Solidity)	
iOS:	SwiftUI, CoreML	

Experience

Artificial Intelligence Intern <i>Stark Digital Media Services Pvt. Ltd.</i>	June 2025 – July 2025
- Built a GST Invoice Chatbot using LLMs to guide users through invoice workflows, reducing manual support overhead. - Engineered a real-time AI Voice assistant for user support. - Architected an enterprise RAG system for secure, context-aware knowledge retrieval across business documents. - Developed an AI document verification pipeline using OCR, NLP, and ML to automate validation and eliminate manual processing.	

Projects

RoadRupture – AI Pothole Prediction App <i>SwiftUI, MapKit, FastAPI, LightGBM</i>	S) <i>GitHub</i>
- Native iOS app predicting pothole locations using LSTM/Prophet (forecasting) trained on historical data. - Delivered geospatial risk heatmaps and real-time alerts, and crowdsourced pothole reporting with photo capture to continuously improve model accuracy.	<i>Location</i> Performance using LightGBM (risk classification) and road-type features.
LabChain Sentinel – Autonomous Lab Safety Monitor <i>Python, FastAPI, Gemini API, Pydantic</i>	<i>GitHub</i>
Built a closed-loop autonomous system for lab safety: (Analyze → Reason → Execute) on Gemini that detects stock-out risks and auto-generates purchase orders with 99% UI stability with NABL/ISO 15189-compliant audit logs.	
AutoReferral – AI Healthcare Referral System <i>FastAPI, React, Agentic AI GDG Bangalore</i>	<i>Live Demo</i>
Designed and deployed within 24 hours a system that recommends referral options with calibrated confidence and explainable health insights.	
BluCarbon – Blockchain Carbon Credit Marketplace <i>React, FastAPI, MongoDB, Solidity, IPFS</i>	<i>GitHub</i>
Co-built a full-stack blue carbon marketplace: DVC, MLflow, FastAPI, Docker, OAuth2, JWT, and NFT carbon credits minted on Polygon.	<i>FS</i> DVI analysis, CNN field-data credibility scoring, smart contracts.
MLOps Pipeline – End-to-End ML Deployment <i>DVC, MLflow, FastAPI, Docker, OAuth2</i>	<i>GitHub</i>
Containerized MLOps lifecycle: Distributed training, hyperparameter tuning, cloud deployment, and a JWT-secured FastAPI inference backend.	<i>Middleware</i>

Education

MIT World Peace University, <i>B.Tech – Computer Science, Artificial Intelligence & Data Science</i>	Aug 2023 – Jun 2029
